

VISION YACHTS

Built By Sailors
for Sailors

Why Choose Vision Yachts?

The Vision is the ultimate boat for cruising couples. Leading by example and thinking out of the box allows us to be pioneers of our trade.

Our passion for quality, craftsmanship and commitment to delivering a product nothing short of superior is the driving force behind our success in achieving our customer's greatest satisfaction.

We are sailors at heart and have built the Vision to be enjoyed by like-minded sailors. There is an unmistakable feeling of certainty one gets from owning a Vision. Certainty that it will keep its good looks, sailing appeal and investment value for decades. And certainty that you made the right choice.

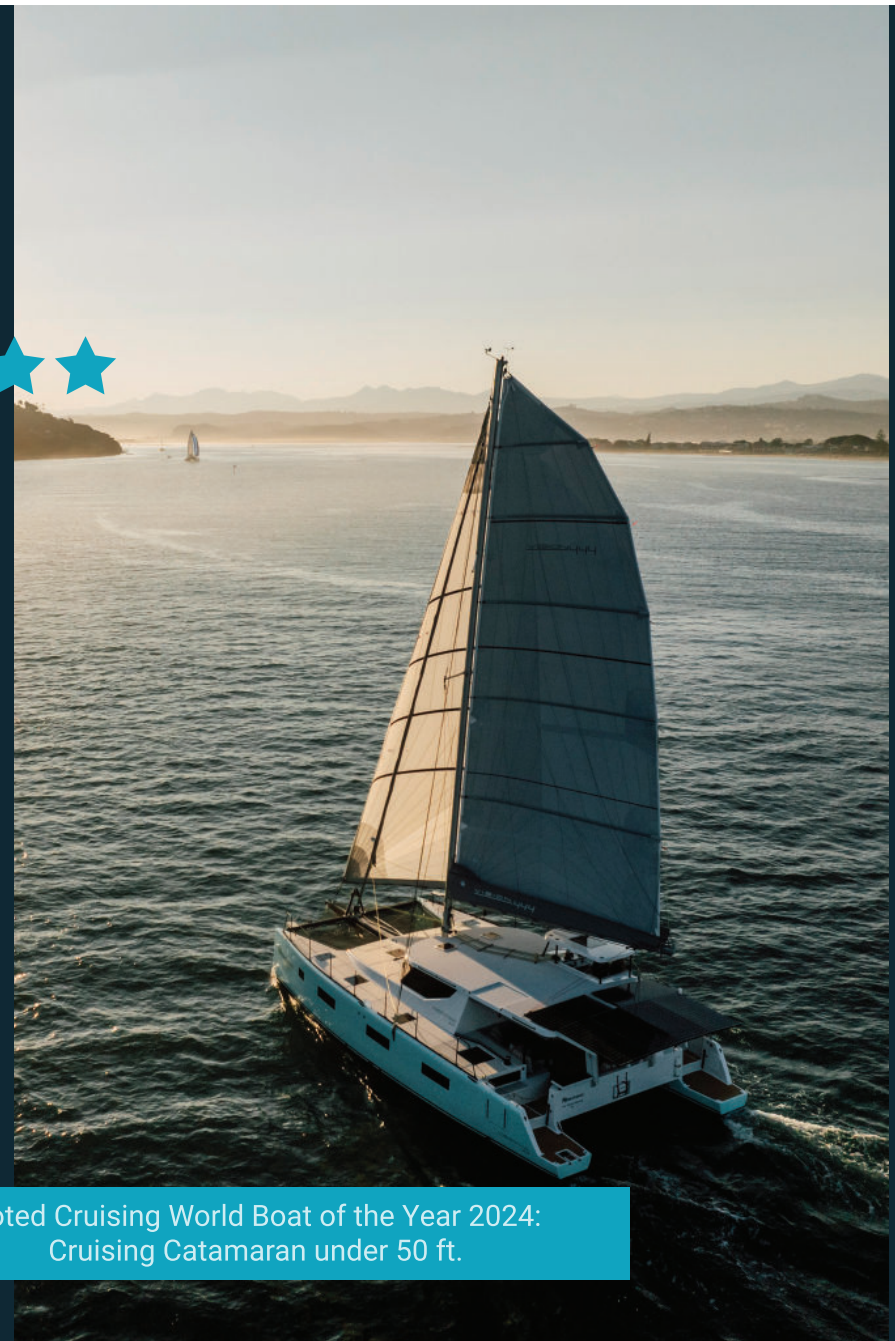

The Vision delivers assertive results in all categories – Performance, Safety, Styling and Ergonomics – making it one of the surest, most principled and intelligent choices in a modern catamaran.

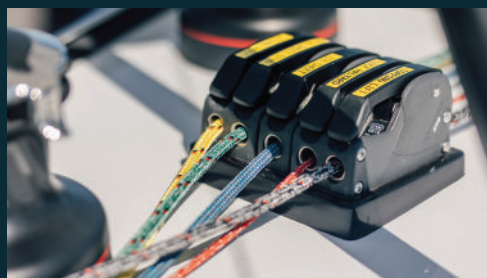

“The state-of-the-art technologies that go into each Vision run a lot deeper than their stately, head-turning, modern styling.”

Andrew Parkinson, Cruising World Magazine

Voted Cruising World Boat of the Year 2024:
Cruising Catamaran under 50 ft.

All the decks are level and clear of ropes, giving you the confidence to move around safely. The mainsheet bridle system is easy and safe to use in conjunction with the self-tacking jib.

The rudders are calibrated to work in conjunction with sails meaning there is no stalling in tacks or general turning. You can get through a tack with hardly any speed loss.

A unique access door system in the cockpit gunwale allows easy access from the dock to board the Vision and it also makes it easy to replenish from a tender.

The boat has a dedicated locker system in the port and starboard hulls. Large, easily accessible storage allows you to open one door to access all your through-hull fittings and pumps, in one contained area.

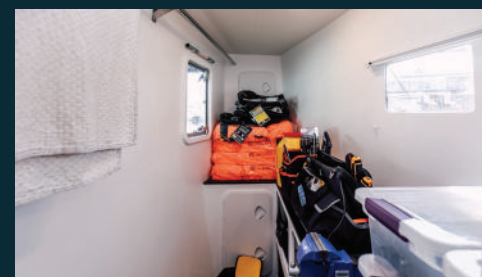

The engine rooms are easy to access. Lift up the lid like a car hood and pull out the locking lever-stay to secure. There is a dedicated seat to sit on when working on the engine and dedicated tools in each engine room which makes servicing a pleasure. Engines can be removed without disassembling the vessel.

The navigation station faces forward which is a great feature when making passage. Sitting in this area you get a clear view looking forward, so when you're filling in logs you can still keep an eye on the ocean.

The unbelievably spacious cockpit has numerous large lockers that can store cockpit cushions, fishing rods and even short surfboards.

The onboard workshop is a unique feature to the Vision. It has won us awards and makes it the perfect, ergonomic work space when tending to day-to-day activities.

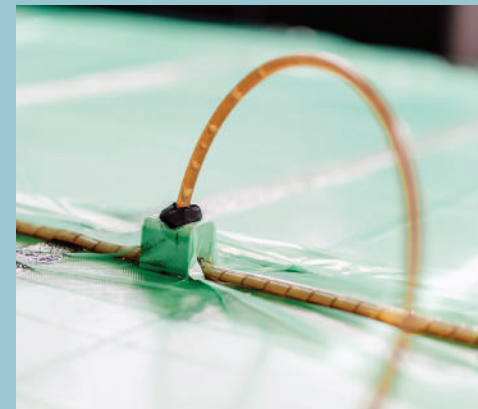

Built By Sailors for Sailors

Performance and Strength

We use an innovative resin-infused, foam sandwich technology with E glass throughout, to form the durable hulls. Optimisation of resin and fibres in the laminate structure increase strength. A highly controlled resin infusion process resulting in a mono-structure, means there is no temperature variation during the construction of the components, so every square inch of the hull is as strong and durable as the next. Decks are extra-tough while still maintaining impressive performance due to the weight-saving process.

The result is a better, lighter, faster, stronger and safer vessel which will hold its investment value longer.

The advanced composite engineering ensures strength, performance and weight-saving.

The Vision has the ideal weight-distributed engine placement (beneath the aft cabins), which allows for easier access, more space to work and ample lighting while performing maintenance or repairs at sea.

The Vision has a state-of-the-art 24v DC system which is as easy to maintain as it is to understand. The lightweight installation has convenient access points throughout the yacht which enables you to identify the source of any electrical problem, in the unlikely event you ever have one. The system is simple and effective, and you don't need an electrical degree to keep it in perfect order.

Each and every counter, unit, fixture and fitting has been masterly crafted, and the generous saloon, cabins, galley and cockpit echo unmistakable quality.

The interior consists of the spacious starboard owners cabin and two port guest cabins. The flow and headspace in the cabins has been designed for maximum comfort and freedom of movement.

Designed to have everything you need 'at hand' the layout is one of the most accessible and durable living spaces to date: there is nothing gimmicky here, and there are no loose components, only quality installations that will stand the test of time.

The considered design and manufacturing expertise of the Vision's sporty and sleek exterior permeates to the interior, where efficient use of space has been optimized.

Elegant Living with Everything on Hand

Our luxurious living philosophy extends to the outdoors allowing the opportunity to relax and socialize, or sunbathe in the wind-protected area of the cockpit.

Models

Vision 444

The Vision 444 is the original flagship model that started the Vision Yachts journey. Designed as the perfect combination of style, elegance and performance, this is the ultimate cruising catamaran for couples. The Vision 444 was awarded the Cruising World Boat of the Year Award 2024 for Cruising Catamarans under 50ft.

Specifications	
LOA	13.12 m
LWL	13.12 m
BOA	7.60 m
Draft	1.17 m
Air draft	19.47 m
Displacement	11.32 Tons (Light craft condition)
Cabins	3
Main sail area	76.54 sq.m
Self tacking jib area	32.3 sq.m
Code 55	70.79 sq.m
Code 65	89 sq.m
Asymmetrical Spinnaker	145 sq.m
Headroom in hulls	1.9 m
Headroom in bridgedeck	2.1 m
Engines	Nanni 37 hp
Keel type	Mini keels

Vision 444ES

The Vision 444 ES is an extension on the original flagship 444 model with an Extended Scoop. The boat offers all the same unique features of the Vision 444 but the Extended Scoop (0.4m) allows for easy access from the dock, easier loading and off-loading and additional space for diving, fishing and swimming.

About Us

Vision Yachts is based in the sailing paradise of Knysna, South Africa. Vision is currently the largest catamaran builder in the area with nine production zones where boats rotate through the production line.

South Africa builds approximately 25% of the world's cruising catamarans and is renowned for producing quality boats that stand the test of time.

We prioritize continuous training and innovation to stay at the forefront of the yachting industry. Our dedicated and motivated team consistently strives for excellence, ensuring every yacht we build meets the highest standards of quality and performance. Through our commitment to cutting-edge technology and skilled craftsmanship, Vision Yachts remains a leader in luxury yacht manufacturing.

We are proud winners of the Cruising World 2024 Boat of the Year in the Cruising Catamaran Under 50ft class.
